# CHAU DA VITS

## Fullstack Developer

davidduongxu1@gmail.com 0337499390 Go Vap District, HCMC linkedin.com/in/davidchau21

## ABOUT ME

Fullstack Developer with advanced expertise in Node.js, NestJS, React.js, and Next.js, specializing in scalable backend systems and responsive frontend interfaces. Demonstrated proficiency in building AI-powered applications, real-time data processing platforms, and enterprise-grade automation workflows. Proven ability to design and maintain microservices architectures while optimizing system performance and ensuring high code quality.

## EDUCATION

- **2020 - 2025** **Industrial University of Ho Chi Minh City**
  Major - Software Engineering

## EXPERIENCE

**WIINTEK TECHNOLOGY CORPORATION** **(03/2025 - 03/2026)**

**Fullstack Developer**

- Architected and deployed scalable microservices backend systems using NestJS, handling real-time data processing for distributed cryptocurrency mining nodes.
- Engineered full-stack Voting and Ticket Support management systems with Nest.js backend and Next.js frontend, enhancing user experience and system reliability.
- Developed AI-powered chatbots and implemented n8n automation workflows, reducing manual customer support efforts by streamlining repetitive operational tasks.
- Built dynamic monitoring dashboards using Next.js and React.js with optimized SEO performance and minimal latency for system visibility.
- Designed and implemented RESTful APIs for mining data processing and complex business logic, ensuring data integrity and system scalability.

**MANGO COMMUNICATIONS AND ADVERTISING COMPANY LIMITED** **(08/2024 - 01/2025)**

**Backend Intern**

- Designed and implemented RESTful APIs aligned with business requirements, emphasizing reliability and maintainability across production systems.
- Diagnosed and resolved critical post-deployment bugs, ensuring system stability and minimal downtime for production environments.
- Optimized API performance through legacy codebase refactoring and MongoDB query optimization, improving query.
- Acquired hands-on expertise with Docker containerization and template rendering for deployment automation.

## PROJECTS

### CRYPTOTRACKER – CRYPTOCURRENCY ANALYTICS (12/2026 - 03/2026)

- Description: A CoinMarketCap-like dashboard displaying live prices, charts, and market stats for top cryptocurrencies.
- Team size: 1
- Responsibilities:
  - Developed a CoinMarketCap-like dashboard displaying real-time cryptocurrency prices, market caps, and trading volumes.
  - Integrated CoinGecko API to fetch live data with automatic refresh and error handling.
  - Implemented interactive charts and filtering for 100+ cryptocurrencies
  - Designed a responsive and user-friendly interface optimized for both desktop and mobile devices.
- Technologies used: React.js, Supabase, CoinGecko API, TypeScript, shadcn-ui, Tailwind CSS.
- Link Demo: https://crypto-tracker-three-hazel-18.vercel.app
- Link Project: https://github.com/davidchau21/CryptoTracker

### EDUBLOG – LEARNING FORUM (08/2024 - 12/2024)

- Description: EForum Blog is a learning platform for secondary and high school students to share knowledge, discuss topics, and interact with an AI chatbot. It offers features like real-time messaging, content management, and administrative tools for managing users and posts.
- Team size: 2
- Responsibilities:
  - Developed backend with Node.js, Express.js, and JWT for authentication.
  - Contributed to the frontend development using React, Vite, and TailwindCSS.
  - Integrated services like AWS S3, MongoDB, Socket.io, and Google Custom Search API and Google Scholar.
  - Built core user and admin features, including content management, real-time chat, and dashboard statistics.
- Technologies used: NodeJS, ExpressJS, JWT, React + Vite, Tailwindcss, AWS(S3), Firebase (authentication google), MongoDB, Socket.io, Google Custome Search API, Gemini API.

## SKILLS

### Technical Skills:

- **Backend Frameworks:** Node.js, NestJS, Express.js, Spring Boot.
- **Frontend Frameworks:** React.js, Next.js, HTML5, CSS3, Tailwind CSS.
- **Languages:** JavaScript, TypeScript, Java, Python.
- **Databases:** PostgreSQL, MongoDB, MySQL, SQL Server.
- **Tools & Platforms:** Docker, Git, N8N, Retrieval-Augmented Generation (RAG)

### Languages:

- **English:** Technical reading & basic communication
