ABOUT ME

Aspiring Fullstack Developer with hands-on experience in building scalable and maintainable web applications using Node.js, NestJS, MongoDB, React.js, and Next.js. Proficient in developing RESTful APIs, optimizing performance, and implementing secure, efficient backend solutions. Passionate about solving complex problems and collaborating within agile teams to deliver innovative, high-impact web applications in a dynamic, growth-oriented environment.

EDUCATION

- **2020 - 2025** **Industrial University of Ho Chi Minh City**
  Major - Software Engineering

EXPERIENCE

MANGO COMMUNICATIONS AND ADVERTISING COMPANY LIMITED **(08/2024 - 01/2025)**

Backend Nodejs Intern

- Designed and implemented APIs to meet business requirements and fixed bugs after project updates.
- Enhanced API performance and stability by refactoring legacy functions.
- Developed and fine-tuned MongoDB queries to support core platform functionality.
- Expanded technical expertise by learning and applying NestJS, Docker, and Handlebars.

WIINTEK TECHNOLOGY CORPORATION **(03/2025 - 06/2025)**

Fullstack Intern

- Developed an AI chatbot web application specializing in blockchain and cryptocurrency support.
- Built and optimized backend services using Node.js, Express, and PostgreSQL for data storage and retrieval.
- Implemented AI automation workflows with n8n, improving chatbot responsiveness and task efficiency.
- Designed and developed both frontend interfaces and backend APIs for seamless AI-driven user interactions.
- Collaborated on workflow and system architecture design to ensure scalability and reliability.

WIINTEK TECHNOLOGY CORPORATION **(06/2025 - 11/2025)**

Fullstack Developer

- Built and maintained microservice-based backend systems using NestJS for a cryptocurrency mining management platform.
- Designed and implemented RESTful APIs to handle mining data processing and system logic.
- Developed frontend chatbot interfaces for user support and system monitoring.
- Created and managed WordPress content workflows, including AI-powered automation for post publishing and updates.
- Collaborated with team members to enhance system scalability, security, and automation efficiency.

PROJECTS

EDUBLOG – LEARNING FORUM (08/2024 - 12/2024)

- Description: EForum Blog is a learning platform for secondary and high school students to share knowledge, discuss topics, and interact with an AI chatbot. It offers features like real-time messaging, content management, and administrative tools for managing users and posts.
- Team size: 2
- Responsibilities:
  - Developed backend with Node.js, Express.js, and JWT for authentication.
  - Contributed to the frontend development using React, Vite, and TailwindCSS.
  - Integrated services like AWS S3, MongoDB, Socket.io, and Google Custom Search API and Google Scholar.
  - Built core user and admin features, including content management, real-time chat, and dashboard statistics.
- Technologies used: NodeJS, ExpressJS, JWT, React + Vite, Tailwindcss, AWS(S3), Firebase (authentication google), MongoDB, Socket.io, Google Custome Search API, Gemini API.
- Link Project: https://github.com/davidchau21/eforum-blog-web
- Demo: https://eforum.vercel.app

CRYPTOTRACKER – CRYPTOCURRENCY ANALYTICS (10/2025 - 11/2025)

- Description: A CoinMarketCap-like dashboard displaying live prices, charts, and market stats for top cryptocurrencies.
- Team size: 1
- Responsibilities:
  - Developed a CoinMarketCap-like dashboard displaying real-time cryptocurrency prices, market caps, and trading volumes.
  - Integrated CoinGecko API to fetch live data with automatic refresh and error handling.
  - Implemented interactive charts and filtering for 100+ cryptocurrencies
  - Designed a responsive and user-friendly interface optimized for both desktop and mobile devices.
- Technologies used: React.js, Supabase, CoinGecko API, TypeScript, shadcn-ui, Tailwind CSS.
- Link Demo: https://crypto-tracker-three-hazel-18.vercel.app
- Link Project: https://github.com/davidchau21/CryptoTracker

SKILLS

Technical Skills:

- **ProgrammingLanguages:** Java (Spring Boot, MVC), JavaScript, HTML, CSS, C++.
- **Frameworks&Libraries:** Node.js, NestJS, Express.js, React.js, Next.js, Hibernate, React Native, Bootstrap
- **Database:** MongoDB, MySQL, PostgreSQL, SQL Server, MariaDB
- **Tools & Platforms:** Docker, Git, AWS (EC2, S3, DynamoDB, IAM), N8N, Postman
- **Other:** RESTful APIs, Microservices, JWT, Socket.io, RAG

Languages:

- Basic English communication, proficient in technical reading.
