CHAU DA VITS

Fullstack Developer

davidduongxu1@gmail.com 0337499390 Go Vap District, HCMC https://github.com/davidchau21

ABOUT ME

Fullstack Developer with 2 years of experience specializing in Node.js and NestJS, with hands-on experience in React.js and Next.js. Experienced in designing and developing microservices, scalable backend systems, and AI-powered web applications. Skilled in cloud services, third-party integrations, and real-time systems. Passionate about building clean, maintainable, and high-performance software.

EDUCATION

- **2020 - 2025** **Industrial University of Ho Chi Minh City**
  Major - Software Engineering

EXPERIENCE

WIINTEK TECHNOLOGY CORPORATION **(01/2025 - 07/2026)**

Fullstack Developer

- Designed and optimized backend services and RESTful APIs using NestJS, improving database query performance and reducing response time in real-time systems.
- Implemented efficient MongoDB queries, indexing, and schema design to support high throughput data processing.
- Built real-time features using WebSocket for distributed system communication.
- Developed AI-powered chatbot systems using RAG and AI Agents, integrated with n8n automation workflows to optimize operational efficiency.
- Designed and implemented a microservices-based system for cryptocurrency mining, handling distributed nodes and real-time data streams.
- Technologies: Node.js, NestJS, React.js, Next.js, TypeScript, MongoDB, WebSocket, n8n, RAG, AI Agents

MANGO COMMUNICATIONS AND ADVERTISING COMPANY LIMITED **(08/2024 - 01/2025)**

Backend Developer Intern

- Designed and implemented RESTful APIs aligned with business requirements, ensuring reliability and maintainability in production environments.
- Diagnosed and resolved post-deployment issues, improving system stability and reducing downtime.
- Refactored legacy codebase and optimized MongoDB queries to improve API performance and reduce response time.
- Utilized Docker for containerization and deployment, enhancing development and deployment consistency.
- Technologies: Node.js, NestJS, MongoDB, Docker, RESTful API, Handlebars

PROJECTS

AI CUSTOMER SUPPORT CHATBOT (12/2025 - 03/2026)

- Description: Embeddable AI chatbot platform with RAG-based knowledge retrieval and real-time automated support.
- Team size: 3
- Responsibilities:
  - Built backend with NestJS and engineered a RAG pipeline using embeddings and Supabase (Vector Store) for intelligent data retrieval.
  - Designed and implemented AI workflows using n8n with webhook integration to automate repetitive business processes.
  - Implemented real-time user-admin interaction using Socket.io.
  - Created an embeddable chat widget using React and Tailwind CSS for seamless integration.
- Technologies: NestJS, Node.js, React.js, Tailwind CSS, n8n, Supabase, PostgreSQL, Socket.io, RAG, AI Agent, OpenAI/Gemini API.

- Link FE: https://github.com/davidchau21/chatbot_fe

EDUBLOG – LEARNING FORUM (08/2024 - 12/2024)

- Description: A full-stack learning community platform where students can share knowledge, publish educational content, join communities and groups, exchange documents, communicate in real time, and interact with an AI chatbot powered by RAG.
- Team size: 2
- Responsibilities:
  - Developed RESTful APIs and backend services using Node.js, Express.js, MongoDB, and JWT, while contributing to the frontend with React, Vite, and Tailwind CSS.
  - Built social networking features including communities, groups, friend/follow systems, document sharing, and a complete Admin CMS.
  - Implemented real-time chat, Socket.IO notifications, and Redis for scalable real-time communication.
  - Integrated Gemini API, cloud storage, authentication, and external search services.
- Technologies: NodeJS, ExpressJS, JWT, React + Vite, Tailwindcss, AWS(S3), Firebase (authentication google), MongoDB, Socket.io, Google Custom Search API, Gemini API, Supabase Storage, RAG.

SKILLS

Technical Skills:

- **Languages:** JavaScript, TypeScript, Java, Python.
- **Backend:** Node.js, NestJS, Express.js, Spring Boot.
- **Frontend:** React.js, Next.js, HTML5, CSS3, Tailwind CSS.
- **Databases:** PostgreSQL, MongoDB, MySQL, SQL Server, Redis.
- **AI & Automation:** N8N, Retrieval-Augmented Generation (RAG), AI Agents, Prompt Engineering.
- **Tools & Platforms**: Docker, Git, Postman, Linux

Languages:

- **English:** Technical reading & basic communication
